

Vector Frame Kit 24

VF-K-24

The innovative, contemporary and clean appearance of the Vector Frame™ line of exhibit kits will captivate your audience. Kits feature push-fit fabric graphics, easy-to-assemble extrusion frames, accent lighting, tables, counters, literature accessories, monitor mounts and interior LED edge lighting where indicated.

features and benefits:

- 50mm silver extrusion frame
- Single-sided SEG dye-sublimated push-fit fabric graphics
- Counters available in four thermoform finishes, shown below
- Max monitor weight = 25 lbs / 11.3 kgs
- Kit includes frame, four fabric graphic panels, two fabric graphic counters, two monitor mounts, two 120 watt lights, and three wheeled molded cases
- Lifetime hardware warranty against manufacturer defects

Step 1: Assemble Right End Frame

Arrange pieces on the floor as shown in the diagram below. Assemble frame by locking CB9-R's and CB9-S's to the F42s and F34. Press snap on button to lock TUBE-30-1155 to CB10-R on top and bottom. When locking be sure to turn each cam a little bit and then go back and tighten to the proper tension. Take care to turn locks only half a turn. Slide the IB2 into the extrusion to connect side. Tighten to the proper tension to lock extrusions together.

Step 2: Assemble Middle Frame

Arrange pieces on the floor as shown in the diagram below. Assemble frame by locking CB9-R's and CB9-S's to the F42s and F22. Press snap button to lock TUBE-30-1155 to CB10-R on top and bottom. When locking be sure to turn each cam a little bit and then go back and tighten to the proper tension. Take care to turn locks only half a turn. Slide the IB2 into the extrusion to connect side. Tighten to the proper tension to lock extrusions together.

Step 3: Assemble Right Frame

Arrange pieces on the floor as shown in the diagram below. Assemble frame by locking F37 to VE-85. Slide the IB2 into the extrusion to connect. Lock extrusions together with middle and end frames. When locking be sure to turn each cam a little bit and then go back and tighten to the proper tension. Take care to turn locks only half a turn. Tighten to the proper tension to lock extrusions together.

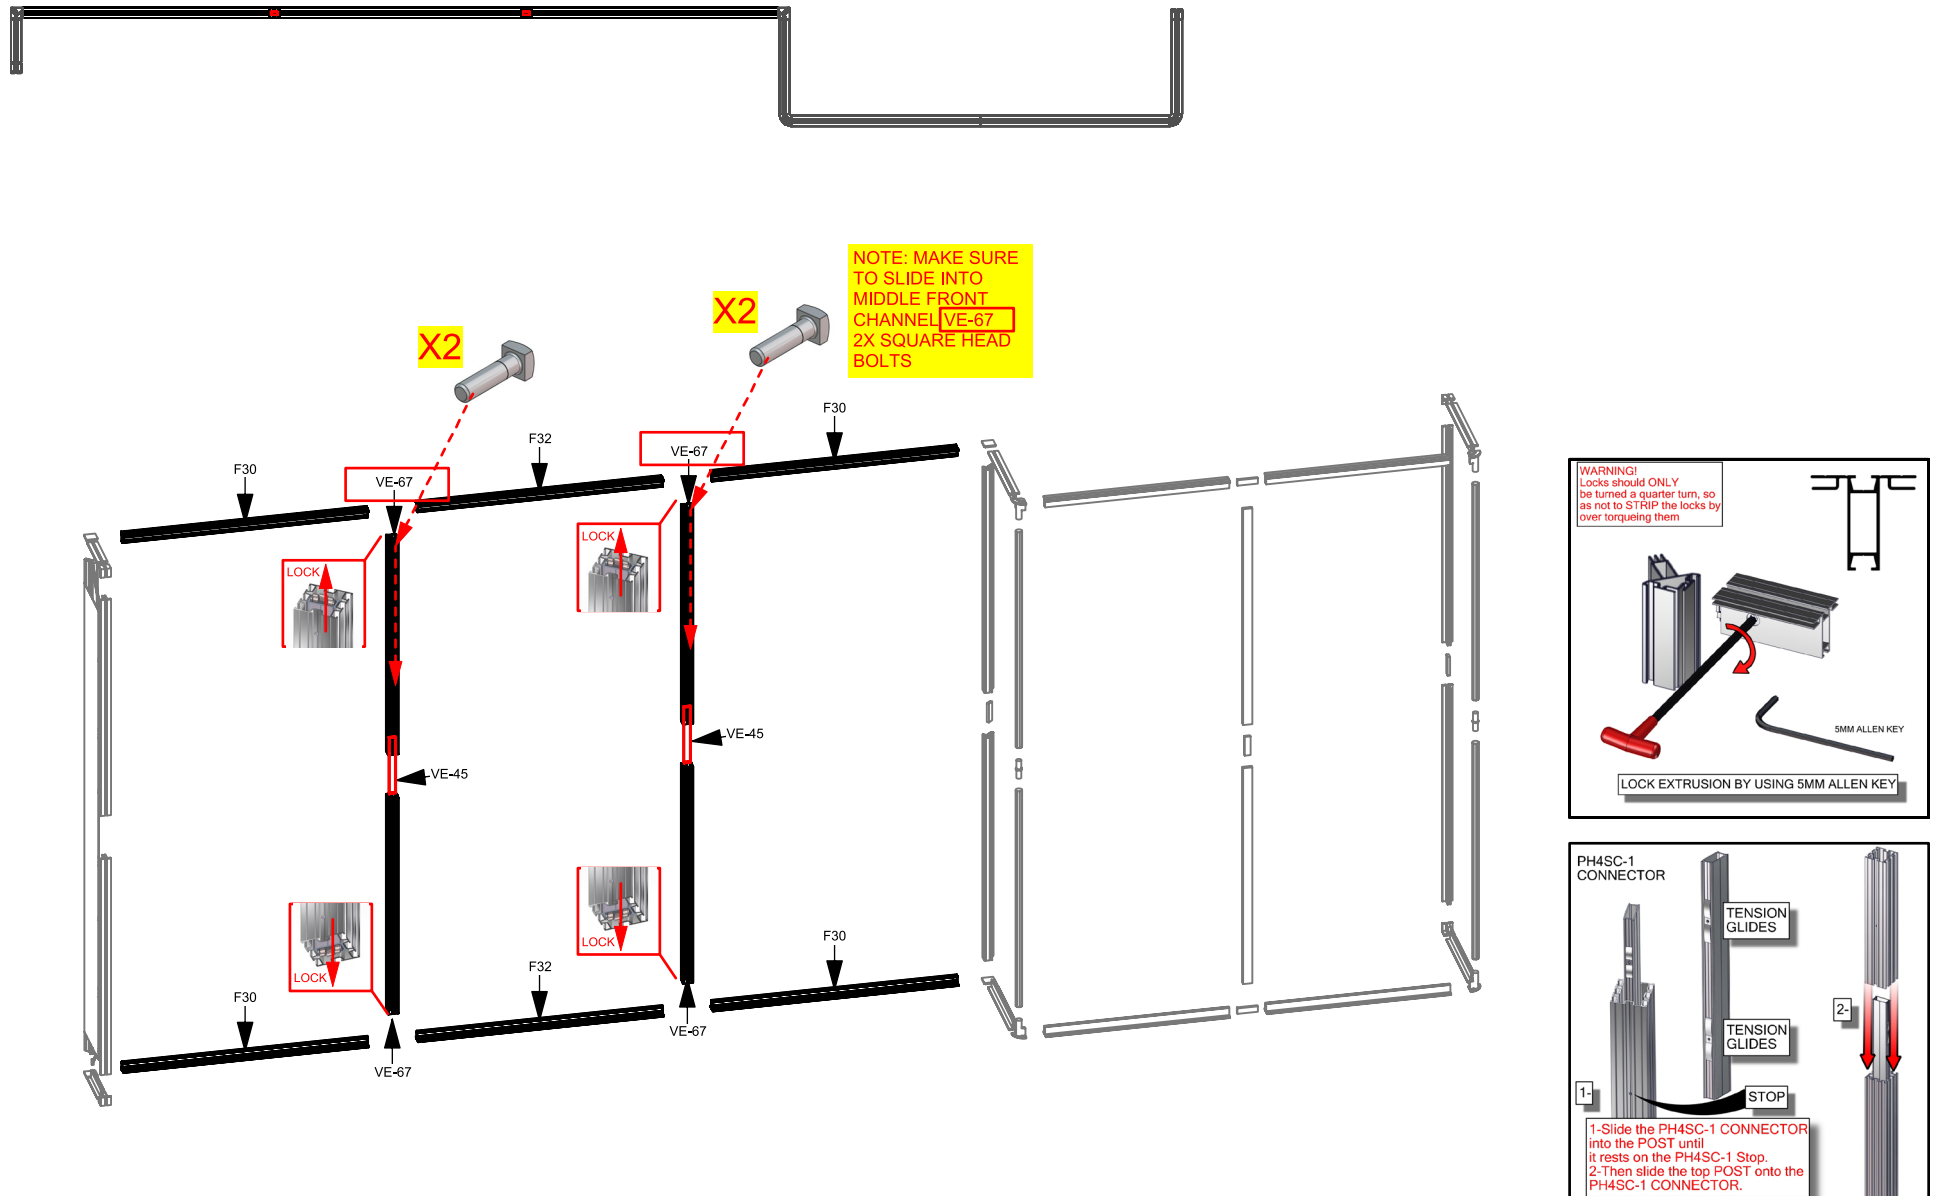

Step 4: Assemble Truss End Section

Arrange pieces on the floor as shown in the diagram below. To assemble frame, lock CB9-S to F44, F34 and F22s. Slide the IB2 into the extrusion to connect sides. Tighten to the proper tension to lock extrusions together. Install graphic by pressing the FCE-2 edge of graphic into the channel of the extrusion. Start in upper left corner and insert in remaining corners, then push graphic into each side. Assure graphics are tightly inserted.

Step 5: Assemble Center Frame

Arrange pieces on the floor as shown in the diagram below. To assemble frame, start at bottom locking VE-67 to the F30s and F32s. Slide the IB2 into the extrusion to connect sides. When locking be sure to turn each cam a little bit and then go back and tighten to the proper tension. Take care to turn locks only half a turn. Tighten to the proper tension to lock extrusions together. *Important: before securing F30s to F32 at top, make sure to slide into middle front channel of VE-67 two square head bolts for monitor mount.

Step 6: Attach Graphics & Monitor Mount

Install graphic(s) by pressing the FCE-2 edge of graphic into the channel of the extrusion. Start in upper left corner and insert in remaining corners, then push graphic into each side. Align graphic with cutout for VE-76. Assure graphics are tightly inserted. Secure monitor mounts with washer and wingnut.

Push fabric with FCE-2 edge folded over into each corner of frame.

Press into the middle of the inside channel and continue around perimeter.

To remove graphic, use the pull tab and gently pull graphic from frame.

Graphic Storage & Care: Graphics should be folded with the graphic facing inward and stored in a ziplock / sealable plastic bag. Spot clean by wiping with a damp white cloth. If washing is necessary, use a commercial size front-loading washing machine, gental cycle with cool water. Line dry flat. Dry cleaning is NOT recommended to prevent shrinkage.

Step 7: Attach Lights

Slide light clip onto each light. Then slide light into the extrusion channel at an angle and gently lower down and repeat for each light.

1- Slide light clip onto the LIGHT.
2- Then slide the LIGHT into the channel at an angle and then gently lower down.

Step 1: Assemble Counter Frame

Arrange pieces on the floor as shown in the diagram below. Assemble frame sides by locking F43s and TUBE-30-910s to the CB10-Rs. Continue frame assembly by locking F40 to VE-68 to the extrusion. When locking be sure to turn each cam a little bit and then go back and tighten to the proper tension. Take care to turn locks only a quarter turn, so as to not strip the locks by over tightening.

Step 2: Install Internal Shelf

Assemble shelf support frame by securing VE-80 to PE-1000 extrusion. With VE-80 secured to PE-1000, slide PE-1000 into counter frame as shown below. Lock each frame to F-24 using Allen Key. Install internal shelf (VFC-02-CT-S) on top of VE-80s.

Step 3: Apply Graphics & Attach Countertop

Apply push-fit fabric graphic(s) by pressing the FCE-2 edge of graphic into the channel of the extrusion. Start in upper left corner, go across the top and then down the sides to the bottom. Repeat for each side. Assure each graphic is tightly inserted. When taking graphics off, take care to gently pull by attached pull tab. Next, gently place the countertop onto the completed frame. Lock countertop into place using Hex Key. Lock countertop into place using Hex Key.
